

Ryan Romig

IT Specialist | 785-304-6212 | ryan@ryanromig.com

Professional Summary

Highly dedicated and technically proficient specialist with a proven background in system diagnostics, root cause analysis, hardware/software configuration, and end-user support. Expertise in providing comprehensive technical assistance across diverse platforms, including Windows, Linux, Mac Operating Systems, embedded devices, mobile devices, peripheral equipment (printers, phones), and networking components. Adept at responding to service tickets and complex user requests—diagnosing root causes, implementing solutions, and training non-technical staff. Seeking to leverage strong analytical skills, attention to detail, and commitment to customer satisfaction.

Core Skills

Systems Setup & Configuration

- Installed and configured operating systems, software, and security updates
- Set up new devices including user accounts, applications, and system preferences
- Performed data transfers, backups, and system restorations
- Maintained organized documentation of repairs and service requests

Technical Support & Troubleshooting

- Diagnosed and resolved hardware and software issues across PCs, laptops, and mobile devices
- Performed system troubleshooting for Windows operating systems and common applications
- Identified root causes of technical failures and implemented effective solutions
- Provided in-person and remote support for a wide range of user issues
- Managed and responded to service requests using ticketing systems

Hardware & Device Repair

- Repaired desktops, laptops, tablets, and smartphones in high-volume repair environments
- Replaced and upgraded components including RAM, storage drives, screens, and batteries
- Performed device diagnostics using industry tools and repair software
- Tested and verified full device functionality after repairs

Networking & Peripheral Support

- Configured and troubleshot network connections, including Wi-Fi and Ethernet setups
- Installed and maintained printers, scanners, and other peripheral devices
- Assisted with basic network troubleshooting and connectivity issues
- Supported device integration within networked environments

Customer Service & Communication

- Assisted customers in understanding technical issues and repair solutions
- Communicated complex technical information clearly to non-technical users
- Delivered high-quality service in fast-paced repair shop environments
- Built customer trust through professionalism and effective problem resolution

Electronics Assembly & Soldering

- Through-hole, surface mount (SMT), and micro-soldering (down to 01005 components)
 - BGA rework, PCB repair, and component-level diagnostics, multimeter
 - Wire routing, cable assembly, and terminal crimping
 - Experience working in ESD-safe environments and handling sensitive components
