

Ryan Romig

Electronics Assembler | 785-304-6212 | ryan@ryanromig.com

Professional Summary

Electronics technician with extensive hands-on experience in precision soldering, PCB repair, and electronic assembly. Skilled in working with fine-pitch components, following detailed work instructions, and performing testing and diagnostics using industry-standard equipment. Strong attention to detail, mechanical aptitude, and commitment to quality in production environments.

Core Skills

Electronics Assembly & Soldering

- Through-hole, surface mount (SMT), and micro-soldering (down to 01005 components)
- BGA rework, PCB repair, and component-level diagnostics
- Wire routing, cable assembly, and terminal crimping
- Experience working in ESD-safe environments and handling sensitive components

Testing & Diagnostics

- Use of multimeters, oscilloscopes, power supplies, and signal generators
- Functional testing, troubleshooting, and failure analysis
- Experience tracking, categorizing, and documenting defects
- Ability to interpret test results and identify nonconforming assemblies

Manufacturing & Assembly Processes

- Reading and following schematics, work instructions, and assembly diagrams
- Repetitive assembly work with focus on consistency and quality
- Quality control checks and inspection of completed assemblies
- Familiar with 5S and maintaining organized, clean workspaces

Mechanical & Tooling Skills

- Skilled with hand tools, power tools, jigs, and fixtures
- Experience designing and using custom fixtures to improve assembly accuracy
- Precision handling and alignment of small electronic components

Training & Process Improvement

- Trained technicians in soldering techniques and repair processes
 - Identified defects and recommended process improvements
 - Created structured approaches to improve repair consistency and efficiency
-

Professional Experience

CAD/Tooling Technician — Selmec Inc. | 2023–2025

Software Developer / R&D Technician — Underwater Audio | 2020–2023

Electronics Repair Specialist / Store Manager — Various Locations | 2008–2020

- Performed precision electronics repair, assembly, and testing across roles
 - Built, modified, and validated electronic systems and components
 - Supported production and engineering teams with tooling, debugging, and process improvements
 - Maintained high standards of quality, documentation, and workflow organization
-

Education

ASP.NET C# Full Stack Certification — DevU (2019)

UX/UI Certification — Coursera (2024)

Additional Strengths

- High manual dexterity and fine motor control
- Strong attention to detail and workmanship quality
- Ability to follow detailed procedures and meet production requirements
- Reliable in fast-paced, team-oriented environments
