

Ryan Romig

Software Developer | Phone: 785-304-6212 | Email: ryan@ryanromig.com

Professional Summary

Versatile Software Developer with strong experience across full-stack web development, Android development, embedded C/C++, and CAD-driven engineering workflows. Adept at building intuitive UIs, developing robust backend components, and designing custom tools to improve productivity. Known for rapid learning, excellent debugging skills, and the ability to bridge software, hardware, and product development.

Technical Skills

Languages: JavaScript, TypeScript, Java, Kotlin, C#, C/C++, SQL, HTML, CSS

Frontend: React, UX/UI Design, Responsive Design

Backend: Node.js, Express, REST APIs, MongoDB

Tools & Platforms: Docker, Linux, Git, Virtualization, NX, SolidWorks, FreeCAD, Blender

Specialties: Embedded Development, Android Development, CAD Automation, PCB/Electronics

Professional Experience

CAD/Tooling Technician — Selmet Inc. (2023–2025)

- Designed and developed custom tooling and fixtures with engineering and production teams.
- Created in-house software tools to streamline workflow, reducing errors and boosting throughput.
- Automated CAD tasks using C# macros, improving modeling speed.
- Utilized NX, SolidWorks, FreeCAD, and Blender for modeling and prototyping.
- Managed tooling inventory, audits, and vendor requisitions.
- Improved internal web forms using HTML, CSS, and JavaScript.

Software Developer / R&D Technician — Underwater Audio (2020–2023)

- Developed Android app features and bug fixes using Java and Kotlin.
- Worked on embedded C/C++ firmware development.
- Designed a custom soft keyboard for small displays, improving usability.
- Created documentation to support onboarding and team knowledge.
- Collaborated with external teams to validate requirements and meet deadlines.
- Streamlined production processes with custom software solutions.

Electronics Repair Specialist / Store Manager — Various Locations (2014–2020)

- Repaired consumer electronics including phones, consoles, and computers.
- Specialized in micro-soldering, logic board repair, and data recovery.
- Trained technicians across multiple stores.
- Managed inventory, sales tracking, and profit/loss reports.
- Delivered excellent customer service and technical communication.

Education

Full Stack Certification — DevU (2019)

UX/UI Certification — Google (2024)
